SafeTrail is a mobile application designed to help schools and communities prepare for disasters. It provides safety guides, emergency contacts, and preparedness resources in one platform. It aims to keep users informed, ready, and safe during emergencies.

1. Sign Up

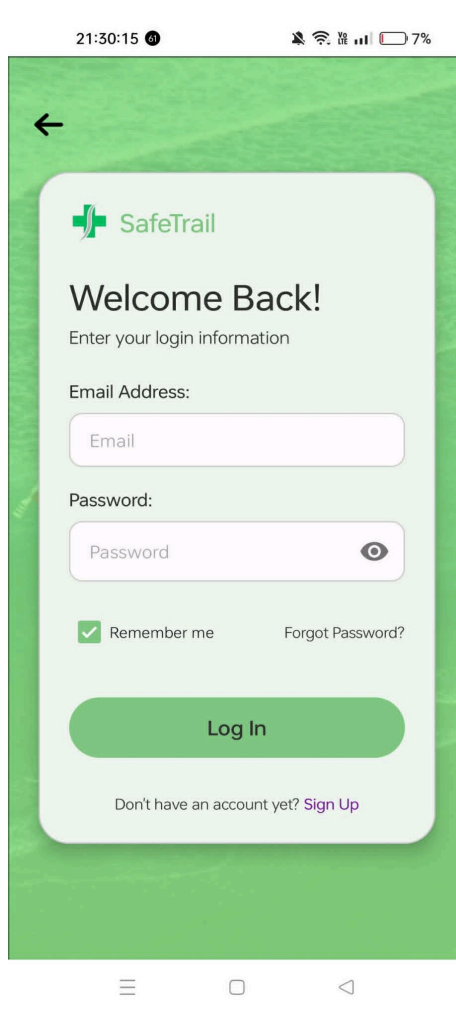

Sign Up (Creating a New Account)

Description:

The Sign Up feature allows new users to create an account in SafeTrail. Users are required to enter their username, email address, password, and confirm their password. After registration, an email verification is required to activate the account.

How to Sign Up:

1. Open the SafeTrail app.
2. Tap **Create Account**.
3. Fill in the required details:
 - a. Username
 - b. Email Address
 - c. Password
 - d. Confirm Password
4. Tap the **Create Account** button.
5. Check your email for the verification message.
6. Click the verification link sent to your **spam** email.
7. After verification, you will be redirected to the login page.

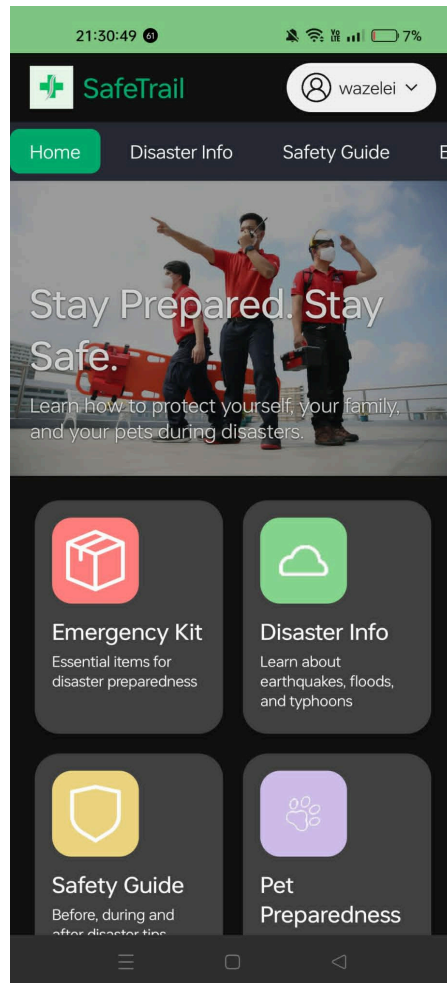

2. Login (Accessing Your Account)

Description:

The Login feature allows registered users to access their SafeTrail account. Once the correct username and password are entered, users are redirected to the homepage. This gives full access to all features of the app.

How to Login:

1. On the Login page, enter your **Username**.
2. Enter your **Password**.
3. Tap the **Login** button.
4. If the credentials are correct, you will be redirected to the **Homepage**.
5. If the password is not remembered, click **Forgot Password**.

3. Homepage

Description:

The Homepage is the main screen of the SafeTrail app. It gives users quick access to all features such as disaster information, emergency hotlines, and safety guides. It is designed to be simple and easy to use, especially during urgent situations.

How to use the Homepage:

1. Open the SafeTrail app.
2. View the available features on the screen.
3. Tap **Drop-Down**. Select Dark mode/Light Mode/Log out features.
4. Tap any feature/categories to proceed.

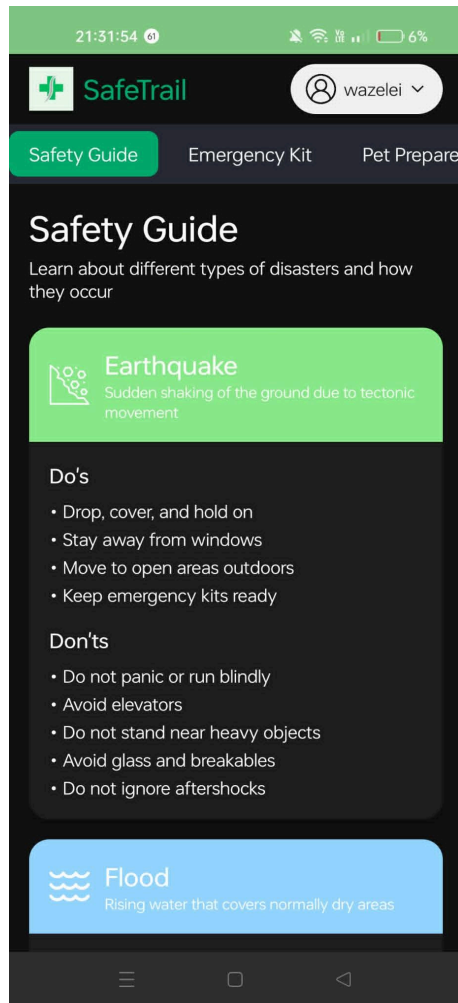

4. Disaster Information

Description:

This page provides detailed information about different types of disasters such as earthquakes, floods, and fires. It helps users understand causes, effects, and possible risks. This improves awareness and reduces panic during emergencies.

How to access Disaster Information:

1. From the Homepage, tap **Disaster Information**.
2. See a type of disaster.
3. Read the provided details.

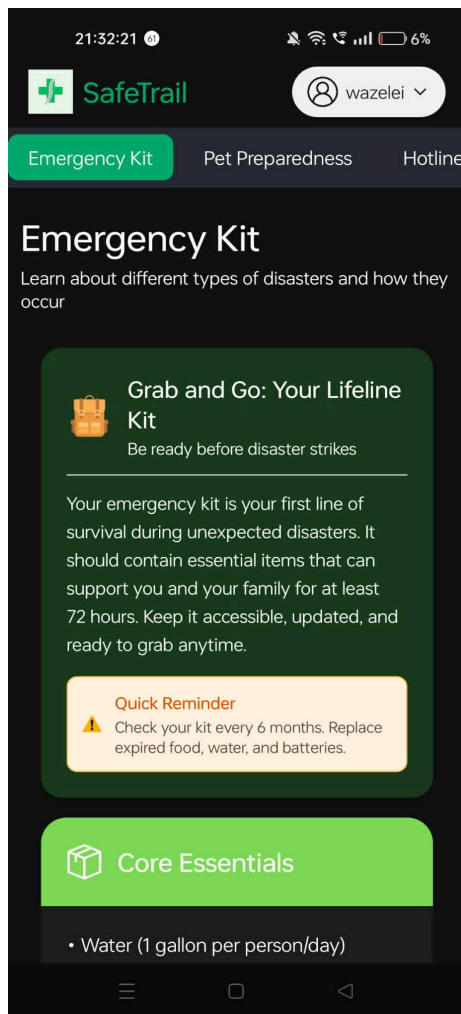

5. Safety Guide (Do's and Don'ts)

Description:

This section provides guidelines on what to do and what to avoid during disasters. It helps users make safe and correct decisions. It reduces the risk of injury and damage.

How to view Safety Guide:

1. Tap **Safety Guide** on the Homepage.
2. View a disaster type.
3. Read the Do's and Don'ts carefully.

6. Emergency Kit Guide

Description:

This feature shows a list of important items needed during emergencies. It includes essentials like food, water, medicine, and tools. It helps users prepare before disasters happen.

How to use Emergency Kit Guide:

1. Tap **Emergency Kit Guide** from the Homepage.
2. View the list of recommended items.

Use the guide to prepare your own kit.

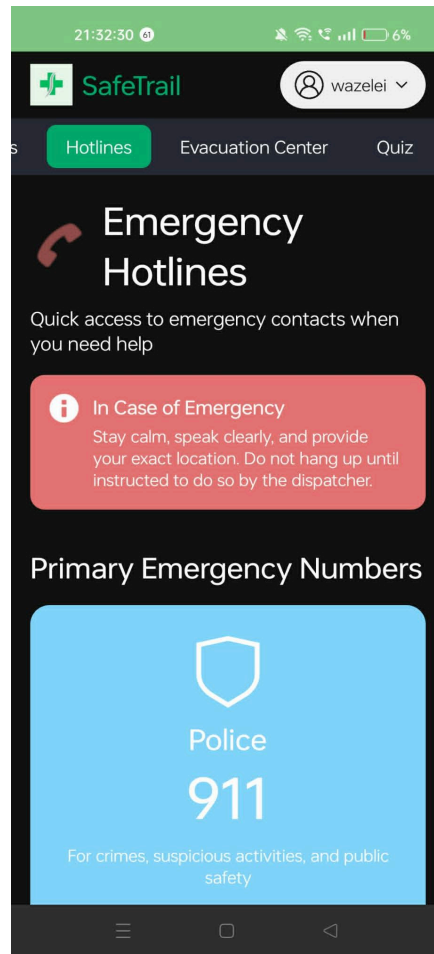

7. Pet Preparedness

Description:

This section provides tips on how to prepare pets during disasters. It includes guidance on food, safety, and transportation for pets. It ensures that pets are also protected during emergencies.

How to access Pet Preparedness:

1. Tap **Pet Preparedness**.
2. Read the safety tips provided.
3. Follow the guide to prepare your pet.

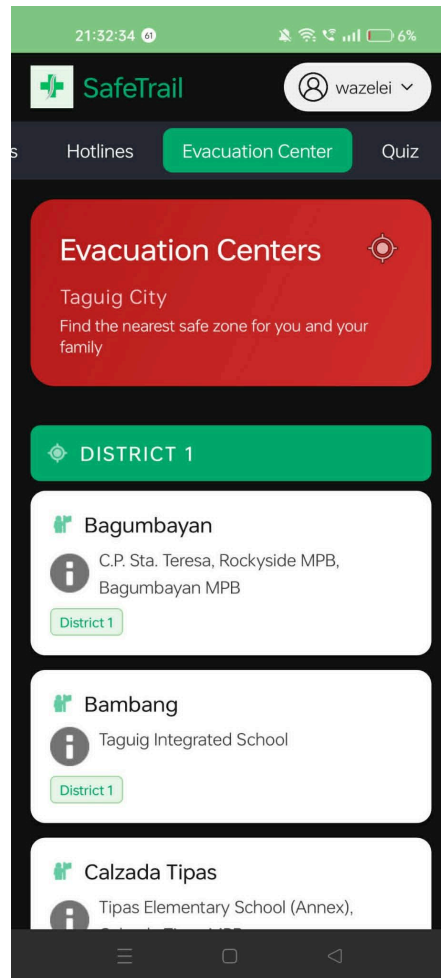

8. Emergency Hotlines

Description:

This feature provides important contact numbers such as police, fire department, and hospitals. It allows quick access to emergency services. It also includes a button that redirects to the phone dialer for faster calling.

How to use Emergency Hotlines:

1. Tap **Emergency Hotlines**.
2. Select a contact number.
3. Tap the call button to open the phone dialer and make a call.

9. Evacuation Center

Description:

The Evacuation Center feature shows a list of available evacuation areas during disasters. It provides the address and location details of each evacuation center. This helps users quickly find a safe place to go during emergencies.

How to use Evacuation Center:

1. From the Homepage, tap **Evacuation Center**.
2. Browse the list of available evacuation centers.
3. View the address and location details of each center.
4. Choose the nearest or most suitable evacuation area.

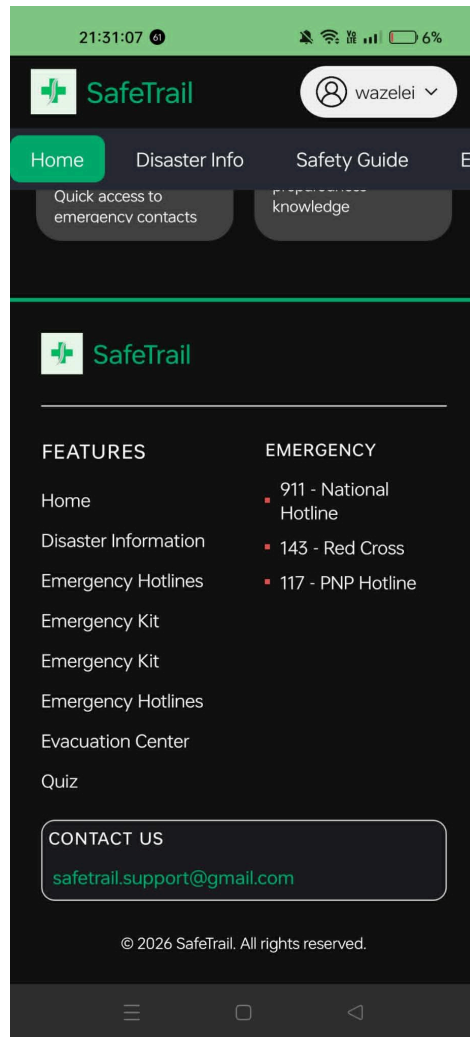

10. Quiz

Description:

The Quiz feature allows users to test their knowledge about disaster preparedness. It makes learning interactive and engaging. It also helps users remember important safety information.

How to take a Quiz:

1. Tap **Quiz** from the Homepage.
2. Choose a quiz topic.
3. Answer the questions and view your score.
4. The scores from your previous quiz will reflect in the progress bar.

11. Contact Us

Description:

This feature allows users to communicate with the developers. It can be used for feedback, questions, or reporting problems. It helps improve the application and user experience.

How to use Contact Us:

1. Tap **Contact Us**.
2. Enter your message or concern.
3. Submit your inquiry.
